

INTERNATIONAL REGISTER OF BANTRY BAY GIGS

Drawing by Achmad Rizky Yansah (Indonesia)

Version : 17 September 2016

30 Years of Atlantic Challenge and 80 gigs built

The inspiration for Atlantic Challenge was Kurt Hahn, whose goal was peace and who worked from 1920 to his death in '74 to draw youths into crews, patrols, watches, small groups to act tougher, in many circumstances--in the mountains, at sea, with dogsleds in the north, and, for me the very finest circumstance--open boats. It is in such groups--which are communities and microcosms. For millennia it has been discovered that one comes to know others vastly, vastly more quickly and certainly by experiencing, whereas with talk such affinities take far longer and often lack the empathy and care leading often to support and compassion.

I began my career in April of '66 in such a boat and discovered in just two days what a remarkable unity and caring series of relations could be formed in such a set up. I think it important the competition is NOT the point. Bernard Cadoret and I wanted collaboration, helping each other to gain skills and camaraderie. When that takes place ashore, and often over beers, the practices lie far from Hahn's vision which I adopted with Bernard.

That said no program in the marine world has logged more than 30 years drawing sixteen nations together for a week, built eighty boats and has decades of caring volunteers put in the effort, raise the funds and nurture generations through experience. As the Digital culture grows, and it is spreading at a steady and to me concerning rate (Moore's Law of 1958) the passivity which it results in and the diminution of skill lends immense importance to what we do. So I try to contain my beliefs but not always.

In admiration.

Lance Lee

In 2014, the gig "Zinneke" was built in Brussels as a social initiative and we wished to know which was the "sail number" of the gig. In getting to know exactly how many gigs were actually built, Cyrille Hervé's list served as a precious basis and was completed by info we started gathering from all over the world.

Once we knew we were 'number 77', the project to collect pictures from all the gigs seemed a logical next step, but was a more complex challenge than we had imagined. Lance Lee's ever enthusiast support pushed us further in the direction of completing the international register with historic data.

Thanks to the international solidarity of the Bantry gig Community, what started as an initiative to know how many gigs were built, has become a common reference and I wish to thank all the people that contributed to it by sending pictures and historical data of the different gigs.

The job's not finished and its improvement -thanks to your input- makes it a common heritage and tribute to all the people that initiated and developed the Bantry gig project as an initiative to help our youth in building a better world.

N° 0 La Résolue

Launch date : Unknown (+/- 1796)

Country : France

Organisation : La Marine Nationale

History: During the Battle of Bantry Bay of December 1796, Admiral Nielly's personal gig (unnamed) was sent from the French Frigate 'La Résolue', in perdition after a collision with *Le Redoutable*, to seek for help. The gig drifted out of her course, failed to reach *L'Immortalité* and beached on Clough Beach at Bere Island. The gig was stored at Bantry House and forgotten till 1944. Stored at the Irish Maritime Museum, she is forgotten again till 1977. Restored, she can be visited at the Irish National Museum –Collin's Barracks in Dublin, as the oldest existing ship of the French Navy.

History: The association "Y d'Ille yole de Rennes" was born in the Maurepas neighbourhood of Rennes in 1998 in response to the call « Défi Jeunes Marins 2000 ». The project to build a gig was realised with the "compagnons bâtisseurs" and two naval carpenters that permitted youngsters of a social insertion program to build "Y d'Ille", which was launched in 2000. The boat is very active since then. Participated to Zinneke Trophy in 2015 and 2016.

Launch date : 2004

Country : Italy, Genova

Constructed by : Bruce Halabisky and Brian McClellan

Organisation : Atlantic Challenge Genova www.atcge.org

Contact: info@atcge.org

History: Crêuza de mä, means "path/ muletrack to the sea". it's also the title of a song by a famous genoese songwriter, Fabrizio de Andrè. Our association was born in 2002; a small group of the brandnew crew was sent to Rockland (Maine) to get the first contact to a Bantry gig. In that occasion, the crew made the very first sails set of our boat. Crêuza de mä, , was built in the harbour of Genoa by a team of american shipwrights (from the shipyard of Rockland) helped by local fishermen. The boat was launched just one month before the start of the International contest of seamanship 2004 (Fishguard, Wales). Since that time, Crêuza de mä has joined every international contest, but also has actively participated in local and national events in the field of wooden boats and seamanship tradition.
